TIPS ON USING BIO-BIZZ

- The above feeding schedule should be used as a guide only. You should look for signals from your plant as to whether more or less feed is required. Environmental conditions such as temperature and humidity should also be taken into consideration.
- When growing in soil it's a good idea to use just water every 3rd watering or once a week to avoid over fertilisation.
- Each time you water, ensure you get some run-off. Around 20% is ideal.
- Do not adjust the pH of your nutrient solution when growing in soil. There is no need, the soil and microbes will do the buffering work for you.
- Bio-Bizz works well with all major soil growing media available. We have seen exceptional results with both Bio-Bizz All-Mix and Tropic Mix and Canna Professional Plus Soil Mixes.
- The above recommended boosters and additives are suggestions only. Other organic boosters and additives are available and will work equally as well with Bio-Bizz. Call the Technical Team on 0333 003 22 96 for more info on what boosters can be used with Bio-Bizz.
