

# Nutrient Heaters - Matching Tanks

## Datasheet

Keeping nutrient temperature at the optimum level is paramount, particularly during chilly winter months.

Cold nutrient temperature can adversely affect your plant's ability to absorb feed, causing stress related problems and reducing overall yields. Our range of nutrient heaters provide a means of maintaining good growing temperatures and are an essential purchase for growers who's plant roots are exposed and more susceptible to cold conditions.

We have Budget Nutrient Heaters offering a cheap yet reliable option and Heavy Duty Nutrient Heaters for those after improved accuracy and stronger construction. The table below indicates which Nutrient Heaters are suitable for our individual NFT Gro-Tanks, Nutrient Tanks and Utility Tanks as well as the number of each model needed to properly heat your solutions in the tanks.

	NFT Gro-Tanks						Nutrient Tanks				Utility Tanks		
	205 GTI	424	604	901	1000	Tank 1 (68 Litre)	Tank 2 (125 Litre)	Tank 3 (195 Litre)	Tank 4 (400 Litre)	90 Litre	180 Litre	250 Litre	
50 Watt Nutrient Heaters	1	-	-	-	-	-	-	-	-	-	-	-	
150 Watt Hydr Nutrient Heaters	-	1	1	-	-	1	-	1	-	1	-	1	
300 Watt Budget Nutrient Heaters	-	-	-	1	1	-	1	1	2	-	1	1	
50 Watt Budget Nutrient Heaters	1	-	-	-	-	-	-	-	-	-	-	-	
150 Watt Budget Nutrient Heaters	-	1	1	2	2	1	2	3	4	1	2	3
